REDUCE OPERATING COSTS AND
INCREASE PRODUCTION RELIABILITY?

It works.

» DON'T SAVE ON SERVICE. RATHER SAVE ON THE PRODUCTION COSTS WITH BLUESERV

"COST-EFFICIENT PRODUCTION IN SPITE OF LOW PROFIT MARGINS –
WITH BLUESERV, YOU HAVE MAXIMUM COVERAGE AGAINST ANY
UNFORESEEN INCIDENTS."

PRODUCE MINERAL POWDERS SAFELY AND COST-EFFICIENTLY

Hosokawa Alpine knows the production processes of ultrafine mineral and metallic powders like no other system engineer on the market.

We therefore know exactly what counts when it comes to operation:

low production costs, reliable and durable machines, inexpensive and immediately available spare parts. In combination with our

tried-and-tested systems, the BLUESERV service brand offers all that in a customised package. Profit from over 115 years of expertise “Made in Germany” and additionally from first-class performance on the sectors **maintenance and repairs, servicing and operating security as well as a reduction of your production costs.**

BLUESERV FOR THE MINERALS BRANCH

TAILOR-MADE SERVICES. COST-EFFICIENT PRODUCTION.

SPARES & REPAIRS

With BLUESERV, you can constantly monitor the natural machine wear during production of mineral powders. We exchange the worn components in good time and repair your system quickly and reliably.

SYSTEM CHECK

Operational safety, process stability and reliability from one source: with the BLUESERV Visio-Check, you leave nothing to chance. Our thorough inspection reduces your production costs on a permanent basis and prevents expensive system failures.

VIB & PIN SOFTWARE

The PIN software and VIB system were developed especially with the requirements of the minerals branch in mind. With your BLUESERV package, you can make use of process-technological potential and ensure precise measurement results, e.g. when measuring vibrations.

ENERGY EFFICIENCY

The lower the margin of the end product, the more worthwhile it is to optimise the energy consumption. BLUESERV tracks down interesting potential, reduces the energy consumption and thus increases the entire cost-efficiency of your system.
